

Topcon Software Solutions

Integrated laser interface

eGIS

Intro:

eGIS is a field data collection software designed to make collection easy and accurate. eGIS utilizes native shapefiles to reduce the amount of data conversions and avoid proprietary formats that hinder data sharing. Through custom toolbars, collections forms, and minimal clicks eGIS makes GIS data collection simple.

Requirements:

eGIS Software:

- Operating System: Windows Mobile 6.1, Windows Mobile 6.5 & 6.5 Embedded
- Compatible Devices: GRS-1, Tesla, FC-25, FC-236

Magnet Field GIS

Intro:

MAGNET Field GIS is powerful intuitive field application software that will increase your GIS productivity and connect you to others in the field as well as in the office. Graphical icons and intuitive workflows help accomplish GIS field tasks such as collection, navigation, data update, code libraries and measurements.

Requirements:

Magnet Field GIS Software:

- Operating System: Windows Mobile 6 (or higher)
- Graphics: : Video Graphics Array (VGA) of 480 pixels x 640 pixels or higher

Field Tools for ArcPad

Intro:

Topcon's extension for ArcPad®, Field Tools for ArcPad®, allows users with existing copies of ESRI's ArcPad software to take full advantage of their Topcon GPS receiver. Users will have access to all of the convenient GPS Configurations in addition to their existing ArcPad functionality. This extension enables users to integrate their existing installations, customizations, and proven workflows with Topcon GIS solutions.

Requirements:

Operating System 32 bit Windows CE.NET 4.2 or higher, Windows XP/XP Tablet PC Edition or Windows 2000, Windows Mobile 2003, Windows Mobile 2003 SE, Windows Mobile 5.0, ArcPad v7.0 or higher Version
